

# How to log into the Chromebook

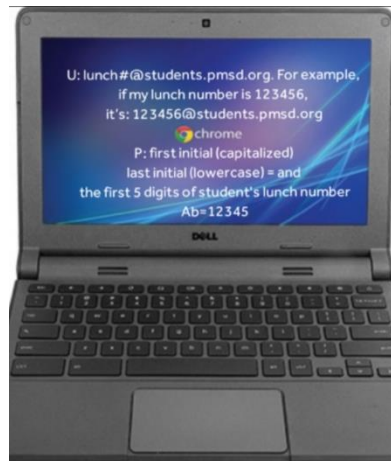

- Make sure that the power cord is properly connected (to itself, an active power source, and the computer.)
- Open up the Chromebook and press the power button located in the upper right hand or left hand corner of the chrome book.

- Once the Chromebook has been turned on, you will see the sign in page.
- Chrome Book log in information:

Username: [lunch#@students.pmsd.org](mailto:lunch#@students.pmsd.org)

Password: first initial (capitalized) last initial (lowercase) = and the first 5 digits of student's lunch number

- Just a disclaimer: At home you will have to connect to your wifi. Any computer work done in school automatically connects to the districts wireless service.
- If at any time you notice that your Chromebook may not be working properly, please contact your respective grade level teacher via email.
