OBJECTIVES/ESSENTIAL CONTENT | ASSESSMENT | LEARNING ACTIVITIES
---|---|---
**OBJECTIVE:** Identify and give the basic function of the following systems.

- **CARDIOVASCULAR:** This system includes the heart and blood vessels. The heart pumps the blood and the arteries and veins transport it. It also includes the respiratory system. This system carries oxygen from the air to the blood stream and expels carbon dioxide from the body. The heart pumps the oxygen into the blood and collects carbon dioxide from it to be expelled through the lungs. This system is basic to life and breathing. Its automatic functions are controlled by the brain.

- **RESPIRATORY SYSTEM:** This system moves oxygen from the outside environment into the body and than removes carbon dioxide. It includes the nose, trachea, lungs, and bronchi. When you breathe in air enters your nose/mouth and goes into the trachea. The trachea branches into two bronchial tubes which go to the lungs. The primary bronchi branches off into smaller tubes which end in the alveoli (air sacs). Oxygen follows this path and enters the blood stream. At the same carbon dioxide passes into the lungs and is exhaled.

- **MUSCULAR SYSTEM:** This system is made up of tissues (muscles) that work with the skeletal system to control movement of the body. Muscles are either voluntary- meaning you decide to move them, or involuntary which move automatically. There are three types of muscles, the skeletal, smooth and cardiac. The skeletal muscles move the body and are voluntary. The smooth muscles are involuntary and are located inside organs. The cardiac muscles are found only in the heart and are involuntary.

- **SKELETAL SYSTEM:** Made up of bones ligaments and tendons. It shapes the body and protects organs. This system works with the muscular system to move the body.

- **ENDOCRINE:** This system consists of glands and hormones. Glands include the pituitary, thyroid, and release hormones directly into the bloodstream. Hormones are chemicals that control body functions such as metabolism, growth and development.

- **MATCHING SHEET TO MATCH THE SYSTEM TO THE FUNCTION.**

- **TAKE A PHYSICAL ACTIVITY AND TELL HOW IT AFFECTS THE VARIOUS SYSTEMS OF THE BODY.**

- **CIRCUIT TRAINING**
- **AEROBIC ACTIVITIES**
- **ANAEROBIC ACTIVITIES**
- **ADVENTURE ACTIVITIES**
- **TAG GAMES**
- **YOGA**
- **HIKING**
- **CLIMBING WALL**
STANDARD STATEMENT C

OBJECTIVE: The students will monitor their body’s response to physical activity.

- **Heart Rate Monitor:** Senses electrical signals from your heart and calculates your heart rate. This can be done using handheld monitors or monitors worn on the body.

<table>
<thead>
<tr>
<th>Target Heart Rate for Children Under 12</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Resting Heart Rate</strong></td>

</tr>
<tr>
<td>76-80</td>
</tr>
<tr>
<td>81-85</td>
</tr>
<tr>
<td>86t</td>
</tr>
</tbody>
</table>

- **Types of Activity and Typical Heart Rates**
  - Light activity (playing at the computer or playing an instrument) heart rate around 120
  - Moderate (brisk walk or yard work) 120-140
  - Vigorous (jog or aerobic dance) 140-180
  - Anaerobic (sprinting or swimming fast, lifting weights) 180 or above.

Regular participation in moderate to vigorous activity can lower your resting heart rate.

- **Blood Pressure:** This is the pressure of blood against the arterial walls. Two numbers are recorded when you take your blood pressure. The first number is systolic; this is peak pressure when the ventricles contract. The second number is diastolic; this is the pressure when the heart is relaxed. Blood pressure gives you an indication of how your circulatory system is working.

Regular participation in moderate to vigorous activity can lower your blood pressure.

- Monitoring and recording heart rate and blood pressure.
- Fitnessgram
- Performance checklist
- Fitness quick check worksheet
- Heart rate log
ENRICHMENT:
- Go to websites listed below for slideshows, more information and quizzes. Print out completed quizzes or write a short story about the slideshows for these systems.
- Go to nurse or Doctor’s office and have blood pressure checked.

REMEDIATION:
- Review worksheet information about each system and write a paragraph summarizing the function of each.
- Work with a partner to find heart rate using monitors.

RESOURCES:

### Course: Physical Education

#### Grade: Grade 5

#### State Standard: 10.4.6 Physical Activity

#### Time Frame:

#### Standard Statements:

- **E** - Identify factors that have an impact on the relationship between regular participation in physical activity and the degree of motor skill improvement.
- **F** - Identify and describe positive and negative interactions of group members in physical activities.

### Unit of Instruction: Invasion Games

#### Standard Objectives/Essential Content

**Objective:** Students will identify things they can do to improve their skills.

- Practice and experience can help you improve your motor skills. Both practice and skill can be gained by regular participation in a variety of physical activities. Usually you will see an increase in motor skill improvement with the more practice and experience opportunities provided through regular participation.

  - **Time on-task:** Reflects the amount of time you are actively participating appropriately in an activity. Good teachers and coaches minimize time wasted by having an organized class/practice.
  
  - **Success oriented activities:** The more skill success you experience the more likely you are to learn the skill. Success can motivate an individual to practice.

  - **Variety of activities:** Helps you improve motor skills through practice and experience.

  - **School and community resources:** Both schools and communities may provide instructional programs that can help you learn about various physical activities.

  - **Examples of school resources include:**
    - Before and after school clubs
    - Recess
    - Varsity sports
    - Courts
    - Fields
    - Pools

  - **Examples of community resources:**
    - Courts
    - Fields
    - Pools
    - Skate parks

#### Assessment

- Log practice time and skill improvement
- Quiz

#### Learning Activities

- Basketball
- Soccer
- Football

Grade 5 - Physical Activity/Invasion Games REV 7-10-08 1
STANDARD STATEMENT F

OBJECTIVE: Identify and describe negative and positive interactions of group members in physical activities.

- Skills to be a successful group member:
  - Display positive as opposed to negative skills in the following areas.
    - Leadership: taking the lead in organizing and running your group. Doing without being bossy or mean.
    - Following: able to take and follow directions to participate and be a happy and cooperative member.
    - Teamwork: working together for the good of the group.
    - Etiquette: using good manners and following the rules and customs of the activity.
    - Adherence to the rules: following the guidelines of the activity you are participating in.

- Examples of social skills that lead to positive interactions include:
  - Cooperation
  - Collaboration
  - Conflict resolution
  - Fairness
  - Working hard
  - Setting goals
  - Awareness of the needs of others

- Examples of negative interactions would include:
  - Winning at all cost
  - Intimidation of others
  - Bullying
  - Aggression

- Teacher observation
- Students chart positive and negative interactions during play.
- Brainstorm a T chart
- Open ended questions
| ENRICHMENT: | • Keep a log of activities outside of school. Compare & contrast moderate vs. vigorous activities.  
• Keep a journal of physical activity participation for a month. Explain activities that you enjoyed/disliked and why. |
| REMEDIATION: | • Using a list of activities, students will perform each and identify if it is moderate or vigorous.  
• List reasons why you enjoy/dislike certain listed activities. |
| RESOURCES: | **Fitness For Life: Middle School**, by Charles Corbin, Guy Le Masurier, Dolly Lambdin (2007), Human Kinetics, Champaign, IL.

FORM 6.6  **Fitness Quick Check—Heart Rate**

Name ____________________________ Date __________

Person A—This person leads a sedentary lifestyle. He or she is inactive, does not participate in any exercise activities, and makes unhealthful food choices.

Person B—This person is active, chooses to eat a healthful, balanced diet, and participates in regular cardiovascular physical fitness activities.

Persons A and B are about the same age, height, and weight.

1. Who is more likely to have a lower resting heart rate? _______________________

2. Explain your answer to the previous question. _______________________
   _______________________
   _______________________

**Scoring:** The number of correct answers ____ divided by the number of possible answers ____ equals the percentage of correct answers ____.

Standard 10.4.6.E

Motor Skill Improvement Quiz

Circle True or False:

1. More practice time will increase skill level. True False
2. An organized P.E. class will offer more practice time. True False

Multiple Choice:

1. A variety of activities will ________________ skill level.
   a. Decrease
   b. Harm
   c. Improve

2. ___________ oriented activities will improve skill level.
   a. Goal
   b. Success
   c. Danger

Matching:

1. ___ YMCA

2. ___ Nature trails

3. ___ Intramural

4. ___ Skate park

5. ___ Recess

6. ___ Varsity sports

A. School Resource
B. Community Resource
Directions: Choose and complete four of the following open ended questions.

1. Rules are important because……

2. We can resolve conflicts respectfully by…..

3. I can show respect for individual differences by…..

4. The qualities of a leader are…..

5. The qualities of a follower are…..

## OBJECTIVES/ESSENTIAL CONTENT

**STANDARD STATEMENT D**

**OBJECTIVE:** Describe and apply the principles of exercise to the components of health-related and skill-related fitness.

- **Define skill-related fitness components:**
  - **Agility:** A component of physical fitness that relates to the ability to rapidly change the position of the entire body in space with speed and accuracy.
  - **Balance:** A skill-related component of physical fitness that relates to the maintenance of equilibrium while stationary or moving.
  - **Coordination:** A skill-related component of physical fitness that relates to the ability to use the senses together with body parts in performing motor tasks smoothly and accurately.
  - **Power:** Skill-related component of physical fitness that relates to the rate at which one can perform work.
  - **Reaction Time:** A skill-related component of physical fitness that relates to the time elapsed between stimulation and the beginning of the response to it.
  - **Speed:** Skill-related component of physical fitness that relates to the ability to perform a movement or cover a distance in a short period of time.

**ASSESSMENT**

- **Students take a physical activity of their choice. They must use examples from that activity to demonstrate the 6 skill-related fitness components.**
- **Reciprocal**
- **Open ended questions (Pg. 197)**

**LEARNING ACTIVITIES**

- **Climbing Wall**
- **Cooperative Games**

**STATE STANDARD: 10.5.6 Concepts, Principles and Strategies of Movement**

**STANDARD STATEMENT:**
A - EXPLAIN AND APPLY THE BASIC MOVEMENT SKILLS AND CONCEPTS TO CREATE AND PERFORM MOVEMENT SEQUENCES AND ADVANCED SKILLS.
B - IDENTIFY AND APPLY THE CONCEPTS OF MOTOR SKILL DEVELOPMENT TO A VARIETY OF BASIC SKILLS.
E - IDENTIFY AND USE SCIENTIFIC PRINCIPLES THAT AFFECT BASIC MOVEMENT AND SKILLS USING APPROPRIATE VOCABULARY.
F - IDENTIFY AND APPLY GAME STRATEGIES TO BASIC GAMES AND PHYSICAL ACTIVITIES.

**ASSESSMENT:**
- TEST
- PERFORMANCE CHECKLIST
- OBSERVATION
  - DEMONSTRATE USE OF MOVEMENT SEQUENCES IN THREE DIFFERENT SITUATIONS.
- MATCHING QUIZ
  - EXAMPLE: AS A FOOTBALL QUARTERBACK, WHAT MOVEMENT SEQUENCE WOULD YOU USE?

**LEARNING ACTIVITIES:**
- BASKETBALL
- SOCCER
- FOOTBALL
- ULTIMATE BALL
STATE STANDARD E

OBJECTIVE: Review, Recognize and Practice Scientific Principles That Affect Basic Movement and Skills Using Appropriate Vocabulary.

- **STATIC AND DYNAMIC BALANCE:** REINFORCE
- **FLIGHT:** REINFORCE
- **NEWTON’S LAWS OF MOTION:**
  - **LAW OF INERTIA:** An object in motion continues in motion and an object at rest remains at rest unless acted upon by a force.
  - **LAW OF ACCELERATION:** Acceleration of an object depends on two things: the mass of an object and the amount of force applied.
    - **More Force:** greater acceleration
    - **More Mass:** less acceleration with equal force
  - **Mass:** amount of matter or substance an object is made of.
  - **ACCELERATION:** any change in motion of an object (speed or direction)
  - **LAW OF ACTION/REACTION:** For every action, there is an equal and opposite reaction.

- **APPLICATION OF FORCE:** The amount of energy expended in a movement. Directly related to mass.

STATE STANDARD F

OBJECTIVE: Analyze and Implement Game Strategies to Basic Games and Physical Activities.

- **ONE ON ONE:** REINFORCE
- **GIVE AND GO:** REINFORCE
- **PEER COMMUNICATION:** REINFORCE

**BASIC CONCEPTS FOR INVASION GAMES:** REINFORCE

- **WRITTEN TEST**
- **RECIPROCAL**
- **SELF - CHECK**
- **TEACHER OBSERVATION:** Demonstrate basic skills in at least three different situations/activities.

- **PROJECT IDENTIFYING SCIENTIFIC PRINCIPLES TO ACTIVITY OF CHOICE.**
- **TEACHER OBSERVATION**
- **DEMONSTRATION OF NEWTONS’ LAWS OF MOTION.**
- **PAGE 237**
- **OPEN ENDED QUESTIONS** (Pg. 198 – 203)
- **DEMONSTRATION OF GIVE AND GO IN THREE DIFFERENT ACTIVITIES.**
| ENRICHMENT:       | • The students will create a journal or log of activities outside of school that are locomotor, non locomotor, and manipulative.  
|                  | • The students will watch a college or professional sporting event and list the movement skills that were demonstrated.  
|                  | • Assist students having difficulty with skills/concepts  
| REMEDIATION:     | • Task cards showing movement sequences  
|                  | • Teacher working with the student individually  
|                  | • Peer coaching

FORM 5.10 **Mirrors**

Name ________________________________

Many concepts can be applied to movement to make it more creative, interesting, challenging, and efficient. In some competitive situations, understanding and applying movement concepts can give you a competitive edge. By completing this assessment you will be able to demonstrate your understanding of mirroring movements while practicing the following skills or movements:

**Directions:** Design a movement sequence that meets the criteria for movements or skills, concepts, and transitions in the following rubric. By using the rubric as you work you can be sure that your sequence will meet or exceed the standard.

</table>

### Standard Statement A:

**Objective:** Explain and apply the basic movement skills and concepts to create and perform movement sequences and advanced skills.

- **Define Movement Skills:** Proficiency in performing non locomotor, locomotor and manipulative movements that are the foundation for participation in physical activities.

- **Define Movement Sequences (Serial Skills):** Two or more movement skills are combined correctly when they flow smoothly from one to another without any breaks. Smooth transitions are important for successful skill use in sports, games and dance. Examples include fielding a ball and throwing it, dribbling a ball and shooting it & performing a gymnastic routine.

  When performing movement sequences you should know how the links between movement skills and concepts should be made and then practice the movements in sequence.

  When first learning a movement sequence or advanced skill you may wish to adjust the skill to make it easier. As you become more skillful, you can gradually increase the skills and concepts necessary to achieve the complete movement sequence or advanced skill.

### Standard Statement B:

**Objective:** Identify and apply the concepts of motor skill development to a variety of basic skills.

- **Review Selecting Relevant Cues:** The cues that you must pay attention to for successful skill execution.

- **Review Feedback:** Feedback provides information related to your skill performance. Using feedback can improve your practice of the skill. Feedback can be internal or external. External feedback is the information given by peers, teachers or coaches.

  - **Written Test**
  - **Reciprocal**
  - **Self-check**
  - **Teacher Observation**
    - Demonstrate basic skills in at least three different situations/activities.

  **Assessment:**
  - Test
  - Performance Checklist
  - Observation
    - Demonstrate use of movement sequences in three different situations.
  - Matching Quiz
    - Example: As a football quarterback, what movement sequence would you use?

**Learning Activities:**
- Dance
- Gymnastics
- Track & Field
• **Define Movement Efficiency:** Knowledge of your body and how to best move in any given situation.

• **Define Product (Outcome/Result):**
  - Knowledge of performance provides information related to the process characteristics of the movement.
  - Knowledge of results provides information related to the outcome of the performance. This looks at the aspects of accuracy, distance, speed, time, height and weight of the skill performed.

• **Define Transfer Between Skills:** When experiences from a previous skill help you learn a new skill it is called positive transfer. The more similarities in between the parts of two skills, the greater amount of positive transfer.

**STANDARD STATEMENT E**

**Objective:** Identify and use scientific principles that affect movement and skills using appropriate vocabulary.

• **Define Newton’s Laws of Motion:**
  - **Law of Inertia:** An object in motion continues in motion and an object at rest remains at rest unless acted upon by a force.
  - **Law of Acceleration:** Acceleration of an object depends on two things: the mass of an object and the amount of force applied.
    - More force – greater acceleration
    - More mass – less acceleration with equal force
  - **Mass:** Amount of matter or substance an object is made of.
  - **Acceleration:** Any change in motion of an object (speed or direction).
  - **Law of Action/Reaction:** For every action, there is an equal and opposite reaction.

• **Define Application of Force:** The amount of energy expended in a movement. Directly related to mass

• **Project Identifying Scientific Principles to Activity of Choice.**
  - Teacher Observation
  - Demonstration of Newton’s Laws of Motion.
  - Pg. 237

• **Dance**
  - **Gymnastics**
  - **Track & Field**
  - **Aquatics**

## State Standard A:
### Objective:
Explain and employ the basic movement concepts to create movement sequences and advanced skills.
- **Movement Skills**: Reinforce
- **Movement Sequences (Serial Skills)**: Reinforce

### Assessment
- **Test**
- **Performance Checklist**
- **Observation**
  - Demonstrate use of movement sequences in three different situations.

### Learning Activities
- Volleyball
- Net/Wall Stations

## State Standard B
### Objective:
Identify and apply the concepts of motor skill development to a variety of basic skills.
- **Relevant Cues**: Reinforce
- **Feedback**: Reinforce
- **Movement Efficiency**: Knowledge of your body and how to best move in any given situation.
  - **Product (Outcome/Result)**:
    - Knowledge of performance provides information related to the process characteristics of the movement.
    - Knowledge of results provides information related to the outcome of the performance. This looks at the aspects of accuracy, distance, speed, time, height and weight of the skill performed.
- **Transfer Between Skills**: When experiences from a previous skill help you learn a new skill it is called positive transfer. The more similarities in between the parts of two skills, the greater amount of positive transfer.
- **Matching Quiz**
  - Example: As a football quarterback, what movement sequence would you use?
### STATE STANDARD E

**OBJECTIVE:** Review, recognize and practice scientific principles that affect basic movement and skills using appropriate vocabulary.

- **STATIC AND DYNAMIC BALANCE:** Reinforce
- **FLIGHT:** Reinforce

### Newton’s Laws of Motion:

- **Law of Inertia:** An object in motion continues in motion and an object at rest remains at rest unless acted upon by a force.

- **Law of Acceleration:** Acceleration of an object depends on two things: the mass of an object and the amount of force applied.
  - More Force: Greater Acceleration
  - More Mass: Less Acceleration with equal force

- **Mass:** Amount of matter or substance an object is made of.

- **Acceleration:** Any change in motion of an object (speed or direction)

- **Law of Action/Reaction:** For every action, there is an equal and opposite reaction.

- **Application of Force:** The amount of energy expended in a movement. Directly related to mass.

### STATE STANDARD F

**OBJECTIVE:** Analyze and implement game strategies to basic games and physical activities.

- **One On One:** Reinforce
- **Give and Go:** Reinforce
- **Peer Communication:** Reinforce

### Basic Concepts for Net/Wall Games

- **Written Test**
- **Reciprocal**
- **Self-check**
- **Teacher Observation:** Demonstrate basic skills in at least three different situations/activities.

- **Project Identifying Scientific Principles to Activity of Choice.**
- **Teacher Observation**
- **Demonstration of Newtons’ Laws of Motion.**
- **Page 237**

- **Open Ended Questions** (Pg. 198 – 203)

- **Demonstration of give and go in three different activities.**
## ENRICHMENT:

- The students will create a journal or log of activities outside of school that are locomotor, non locomotor, and manipulative.
- The students will watch a college or professional sporting event and list the movement skills that were demonstrated.
- Assist students having difficulty with skills/concepts.

## REMEDIATION:

- Task cards showing movement sequences
- Teacher working with the student individually
- Peer coaching

## RESOURCES:

# Grade 5 - Concepts, Principles, & Strategies of Movement/Tactical Games

## Standard Statement:
- A - Explain and apply the basic movement skills and concepts to create and perform movement sequences and advanced skills.
- B - Identify and apply the concepts of motor skill development to a variety of basic skills.
- E - Identify and use scientific principles that affect basic movement and skills using appropriate vocabulary.
- F - Identify and apply game strategies to basic games and physical activities.

### State Standard A:

**Objective:** Explain and apply the basic movement skills and concepts to create and perform movement sequences and advanced skills.

**Define Movement Skills:** Proficiency in performing non locomotor, locomotor and manipulative movements that are the foundation for participation in physical activities.

**Define Movement Sequences (Serial Skills):** Two or more movement skills are combined correctly when they flow smoothly from one to another without any breaks. Smooth transitions are important for successful skill use in sports, games and dance. Examples include fielding a ball and throwing it, dribbling a ball and shooting it & performing a gymnastic routine.

When performing movement sequences you should know how the links between movement skills and concepts should be made and then practice the movements in sequence.

When first learning a movement sequence or advanced skill you may wish to adjust the skill to make it easier. As you become more skillful, you can gradually increase the skills and concepts necessary to achieve the complete movement sequence or advanced skill.

### State Standard B:

**Objective:** Identify and apply the concepts of motor skill development to a variety of basic skills.

**Review Selecting Relevant Cues:** The cues that you must pay attention to for successful skill execution.

**Review Feedback:** Feedback provides information related to your skill performance. Using feedback can improve your practice of the skill. Feedback can be internal or external. External feedback is the information given by peers, teachers or coaches.

### Assessment:
- Test
- Performance Checklist
- Observation
  - Demonstrate use of movement sequences in three different situations.

### Learning Activities:
- Striking/Fielding
- Invasion
- Net/Wall
- Target
- Written Test
- Reciprocal
- Self Check
- Teacher Observation: Demonstrate basic skills in at least three different situations/activities.
- **Define Movement Efficiency:** Knowledge of your body and how to best move in any given situation.

- **Define Product (Outcome/Result).**
  - Knowledge of performance provides information related to the process characteristics of the movement.
  - Knowledge of results provides information related to the outcome of the performance. This looks at the aspects of accuracy, distance, speed, time, height and weight of the skill performed.

- **Define Transfer Between Skills:** When experiences from a previous skill help you learn a new skill it is called positive transfer. The more similarities in between the parts of two skills, the greater amount of positive transfer.

### STATE STANDARD E

**Objective:** Identify and use scientific principles that affect basic movement and skills using appropriate vocabulary.

- **Define Newton’s Laws of Motion:**
  - **Law of Inertia:** An object in motion continues in motion and an object at rest remains at rest unless acted upon by a force.
  - **Law of Acceleration:** Acceleration of an object depends on two things: the mass of an object and the amount of force applied.
    - More force – greater acceleration
    - More mass – less acceleration with equal force
    - Mass: amount of matter or substance an object is made of.
    - Acceleration: any change in motion of an object (speed or direction)
  - **Law of Action/Reaction:** For every action, there is an equal and opposite reaction.

- **Define Application of Force:** The amount of energy expended in a movement. Directly related to mass.

</thead>
<tbody>
<tr>
<td>OBJECTIVE: Identify and apply game strategies to basic games and physical activities.</td>
</tr>
</tbody>
</table>

- DEFINE GIVE AND GO: The give-and-go, often called pass-and-cut, is a basic offensive play in which a player simply passes (gives) to a teammate and cuts (goes) to the basket/goal, attempting to break free of his defender and expecting a return pass from their teammate.

- DEFINE PEER COMMUNICATION: The ability to communicate verbally/nonverbally with your teammates.

- OPEN ENDED QUESTIONS (PG. 198 – 203)

- DEMONSTRATION OF GIVE AND GO IN THREE DIFFERENT ACTIVITIES.

- **Reciprocal**
- **Self Check**
- **Teacher Observation:** Demonstrate basic skills in at least three different situations/activities.
STATE STANDARD E

OBJECTIVE: REVIEW, RECOGNIZE AND PRACTICE SCIENTIFIC PRINCIPLES THAT AFFECT BASIC MOVEMENT AND SKILLS USING APPROPRIATE VOCABULARY.

- STATIC AND DYNAMIC BALANCE: REINFORCE

- NEWTON’S LAWS OF MOTION:
  - LAW OF INERTIA: AN OBJECT IN MOTION CONTINUES IN MOTION AND AN OBJECT AT REST REMAINS AT REST UNLESS ACTED UPON BY A FORCE.
  - LAW OF ACCELERATION: ACCELERATION OF AN OBJECT DEPENDS ON TWO THINGS: THE MASS OF AN OBJECT AND THE AMOUNT OF FORCE APPLIED.
    - MORE FORCE: GREATER ACCELERATION
    - MORE MASS: LESS ACCELERATION WITH EQUAL FORCE
      - MASS: AMOUNT OF MATTER OR SUBSTANCE AN OBJECT IS MADE OF.
      - ACCELERATION: ANY CHANGE IN MOTION OF AN OBJECT (SPEED OR DIRECTION)
  - LAW OF ACTION/REACTION: FOR EVERY ACTION, THERE IS AN EQUAL AND OPPOSITE REACTION.

- APPLICATION OF FORCE: THE AMOUNT OF ENERGY EXPENDED IN A MOVEMENT. DIRECTLY RELATED TO MASS.

STATE STANDARD F

OBJECTIVE: ANALYZE AND IMPLEMENT GAME STRATEGIES TO BASIC GAMES AND PHYSICAL ACTIVITIES.

- PEER COMMUNICATION: REINFORCE

BASIC CONCEPTS FOR TARGET GAMES: REINFORCE

- PROJECT IDENTIFYING SCIENTIFIC PRINCIPLES TO ACTIVITY OF CHOICE.
- TEACHER OBSERVATION
- DEMONSTRATION OF NEWTONS’ LAWS OF MOTION.
