Keep your child reading now, all summer, and beyond.

Welcome!

This summer, your child has the opportunity to use Achieve3000® at home. Achieve3000 is the only platform that builds reading comprehension by meeting every child at his or her precise Lexile® reading levels and steadily moving them to grade-appropriate reading and beyond. Children using Achieve3000's solutions (KidBiz3000®, TeenBiz3000®, and Empower3000®) follow our 5-Step Literacy Routine designed to help them:

- Develop reading strategies for informational text
- Build their academic vocabulary
- Write both formally and informally
- Critically evaluate the information they read

This routine builds the skills children need to stay on track for college and career.

Children should complete 40 lessons to make reading gains this summer!

Making Reading Gains Is as Easy as 1-2-3!

1. Improve Your Child's Comprehension with Achieve3000

- Spark discussions with your child about each lesson's reading topics.
- Ask your child to read articles to you and stop periodically to summarize or ask questions.
- Have your child write one question for each article and research answers together.
- Track your child's activity scores using the reports found in your Home Edition mailbox. Look for first-try scores of 75% or higher.

2. Motivate Your Child to Read More

- Show your child how to use the Search function to find interesting Achieve3000 articles.
- Have your child fill out the Summer Reading Chart with each article read. Consider rewarding your child after articles and activities are completed at 75% or higher.
- Use your child's Lexile level (found in the reports in the Home Edition) to help you find appropriately leveled books.

3. Activate Your Achieve3000 Home Edition

- Promote your child's learning by activating your Achieve3000 Home Edition account.
- Watch this video to learn more about Achieve3000 and how to activate your Home Edition account.
