COURSE: Visual Basic Programming  
GRADE(S): 10 11 12

UNIT 1: Intro to Programming

### NATIONAL STANDARDS:

ALL STUDENTS...

- Demonstrate creative thinking, construct knowledge, and develop innovative products and processes using technology. Students:
- Apply digital tools to gather, evaluate, and use information.
- Use critical thinking skills to plan and conduct research, manage projects, solve problems, and make informed decisions using appropriate digital tools and resources.
- Understand human, cultural, and societal issues related to technology and practice legal and ethical behavior.
- Design, develop, test, and implement programs.
- Gather, evaluate, use, cite and disseminate information from technology sources
- Assess the impact of information technology in a global society
- Demonstrate interpersonal, teamwork, problem solving, and leadership skills
- Develop career awareness, make career choices, and become employable in a variety of careers
- Prepare for further education and lifelong learning

### STATE STANDARDS:

- **M11.A.2** Understand the meanings of operations, use operations and understand how they relate to each other.
- **M11.A.1.3.2:** Compare and/or order any real numbers (rational and irrational may be mixed).
- **M11.D.1** Demonstrate an understanding of patterns, relations and functions.
- **2.5.11C.** Present mathematical procedures and results clearly, systematically, succinctly and correctly.
- **2.5.11A.** Select and use appropriate mathematical concepts and techniques from different areas of mathematics and apply them to solving non-routine and multi-step problems.

### UNIT OBJECTIVES:

1.1 Create basic and understand basic programming algorithms
1.2 Use Form controls and objects to create window forms
1.3 Generate Code inside of button and label objects
1.4 Display graphics through form controls and image boxes
1.5 Accept user input into programs through textboxes

### ACTIVITIES:

1.1 – 1.4
- Basic Form Design
- Button actions
- Displaying images into Picture/Image Boxes
- Generate events using button and label actions

### RESOURCES:

Visual Basic 2008 (Deitel)

### ASSESSMENTS:

- Slide Show Program
- Simple Form Creation and textbox input program

### REMEDIATION:

Use Microsoft PowerPoint to help assist in Form Design

### ENRICHMENT:

- Make the images move around the screen
- Change
- Addition of Rich Text Boxes to forms

**COURSE:** Visual Basic Programming  
**GRADE(S):** 10 11 12

**UNIT 3:** Control Structures

### NATIONAL STANDARDS:

**ALL STUDENTS…**

- Demonstrate creative thinking, construct knowledge, and develop innovative products and processes using technology. Students:
- Apply digital tools to gather, evaluate, and use information.
- Use critical thinking skills to plan and conduct research, manage projects, solve problems, and make informed decisions using appropriate digital tools and resources.
- Understand human, cultural, and societal issues related to technology and practice legal and ethical behavior.
- Design, develop, test, and implement programs.
- Gather, evaluate, use, cite and disseminate information from technology sources
- Assess the impact of information technology in a global society
- Demonstrate interpersonal, teamwork, problem solving, and leadership skills
- Develop career awareness, make career choices, and become employable in a variety of careers
- Prepare for further education and lifelong learning

### STATE STANDARDS:

- **M11.A.2** Understand the meanings of operations, use operations and understand how they relate to each other.
- **M11.B.2** Apply appropriate techniques, tools and formulas to determine measurements.
- **M11.E.2** Select and/or use appropriate statistical methods to analyze data.
- **M11.E.3.2** Apply counting techniques in problem-solving settings.
- **2.5.11C.** Present mathematical procedures and results clearly, systematically, succinctly and correctly.
- **2.5.11A.** Select and use appropriate mathematical concepts and techniques from different areas of mathematics and apply them to solving non-routine and multi-step problems.

### UNIT OBJECTIVES:

1. **3.1** Use and understand the effectiveness of Boolean Variables  
2. **3.2** Write and interpret if/then statements  
3. **3.3** Create nested if Statements in order to  
4. **3.4** Use radio button and checkboxes  
5. **3.5** controls in order to allow user selections

### ACTIVITIES:

- 3.1 – 3.5  
  Revisit Age program and add if statements  
  Password checker program  
  Number -> Letter Grade converter  
  T-Shirt Order Form Program  
  -(Checkboxes and radio buttons)

### RESOURCES:

- Visual Basic 2008 (Deltal)

### ASSESSMENTS:

- Amusement Park GUI Program  
- Shopping/Grocery Store Program  
- Control Structure Quiz

### REMEDIATION:

Work with partners and examine other programmer’s code.

### ENRICHMENT:

Students will add sound to enhance programs.
COURSE: Visual Basic Programming  GRADE(S): 10  11  12

UNIT 4 : Graphics/Keyboard Input

NATIONAL STANDARDS:
ALL STUDENTS…

- Demonstrate creative thinking, construct knowledge, and develop innovative products and processes using technology. Students:
- Apply digital tools to gather, evaluate, and use information.
- Use critical thinking skills to plan and conduct research, manage projects, solve problems, and make informed decisions using appropriate digital tools and resources.
- Understand human, cultural, and societal issues related to technology and practice legal and ethical behavior.
- Design, develop, test, and implement programs.
- Gather, evaluate, use, cite and disseminate information from technology sources
- Assess the impact of information technology in a global society
- Demonstrate interpersonal, teamwork, problem solving, and leadership skills
- Develop career awareness, make career choices, and become employable in a variety of careers
- Prepare for further education and lifelong learning

STATE STANDARDS:

- M11.D.3.1.1 Identify, describe and/or use constantor varying rates of change.
- M11.D.2 Represent and/or analyze mathematical situations using numbers, symbols, words, tables and/or graphs.
- 2.5.11C. Present mathematical procedures and results clearly, systematically, succinctly and correctly.
- 2.5.11A. Select and use appropriate mathematical concepts and techniques from different areas of mathematics and apply them to solving non-routine and multi-step problems.

UNIT OBJECTIVES:

4.1 Display drawings to the form using primitive drawing techniques.(Lines, Points, etc…)
4.2 Use primitive drawing techniques in order to draw figures. (Ellipses, Rectangles, and Polygons)
4.3 Use more higher level techniques in order to draw and display images to the form
4.4 Create basic animations using buttons and images
4.5 Use VB timers to animate objects
4.6 Accept Asycronized and Non-Asycronized keyboard Inputs

ACTIVITIES:

4.1-4.6
- House Drawing using primitive techniques
- Complex house drawing including real images
- Image Manipulation Program
- Click Animation Scene
- Intro to timers and animation program
- Multiple Key Press Race Program
- Interactive Movie with animations

ASSESSMENTS :

MS Paint Program Test
Image/figure slideshow
Simple Race Program
Keyboard Input Quiz

REMEDICATION:

Use graph paper to assist students with their understanding of the forms drawing area.

ENRICHMENT:

Students will add additional challenge content to their MS Paint program, such as the “Spray Can” tool.

RESOURCES:

Visual Basic 2008 (Deital)
### COURSE: Visual Basic Programming  
**GRADE(S):** 10 11 12

**UNIT 5:** Complex Control Structures

### NATIONAL STANDARDS:
**ALL STUDENTS...**
- Demonstrate creative thinking, construct knowledge, and develop innovative products and processes using technology. **Students:**
- Apply digital tools to gather, evaluate, and use information.
- Use critical thinking skills to plan and conduct research, manage projects, solve problems, and make informed decisions using appropriate digital tools and resources.
- Understand human, cultural, and societal issues related to technology and practice legal and ethical behavior.
- Design, develop, test, and implement programs.
- Gather, evaluate, use, cite and disseminate information from technology sources
- Assess the impact of information technology in a global society
- Demonstrate interpersonal, teamwork, problem solving, and leadership skills
- Develop career awareness, make career choices, and become employable in a variety of careers
- Prepare for further education and lifelong learning

### STATE STANDARDS:
- **M11.D.3.1.1** Identify, describe and/or use constant or varying rates of change.
- **M11.D.2** Represent and/or analyze mathematical situations using numbers, symbols, words, tables and/or graphs.
- **2.5.11C.** Present mathematical procedures and results clearly, systematically, succinctly and correctly.
- **2.5.11A.** Select and use appropriate mathematical concepts and techniques from different areas of mathematics and apply them to solving non-routine and multi-step problems.

### UNIT OBJECTIVES:
- **5.1** Use the while, do while, and do until loop to execute statements in a program repeatedly
- **5.2** Use the compound operators to abbreviate assignment operators
- **5.3** Use counter-controlled repetition and sentinel-controlled repetition
- **5.4** Use nested control statements

### ACTIVITIES:
5.1-5.4  
- Blastoff Program  
- Password Security Program  
- Grade entry program  
- Amusement Park Access Program  
- Menu Program  
- Restaurant POS System

### RESOURCES:
- Visual Basic 2008 (Deitel)

### ASSESSMENTS:
- Loops Quiz  
- Graded Menu Program  
- Nested Control Structures Test  
- Grade Book Program Test

### REMEDIATION:
Using Excel to visualize the data for entry

### ENRICHMENT:
Online research of advanced topics and real life business applications that utilize the chapter’s topics.
COURSE: Visual Basic Programming  
GRADE(S): 10 11 12

UNIT 6: Complex Collision and Arrays

NATIONAL STANDARDS:  
ALL STUDENTS...
- Demonstrate creative thinking, construct knowledge, and develop innovative products and processes using technology. Students:
- Apply digital tools to gather, evaluate, and use information.
- Use critical thinking skills to plan and conduct research, manage projects, solve problems, and make informed decisions using appropriate digital tools and resources.
- Understand human, cultural, and societal issues related to technology and practice legal and ethical behavior.
- Design, develop, test, and implement programs.
- Gather, evaluate, use, cite and disseminate information from technology sources.
- Assess the impact of information technology in a global society.
- Demonstrate interpersonal, teamwork, problem solving, and leadership skills.
- Develop career awareness, make career choices, and become employable in a variety of careers.
- Prepare for further education and lifelong learning.

STATE STANDARDS:
- **M11.D.3.1.1** Identify, describe and/or use constant or varying rates of change.
- **M11.D.2** Represent and/or analyze mathematical situations using numbers, symbols, words, tables and/or graphs.
- **2.5.11C.** Present mathematical procedures and results clearly, systematically, succinctly and correctly.
- **2.5.11A.** Select and use appropriate mathematical concepts and techniques from different areas of mathematics and apply them to solving non-routine and multi-step problems.

UNIT OBJECTIVES:
- **6.1** Use and create basic sound effects and produce sound output through VB Forms.
- **6.2** Detect collision between rectangular bounding boxes surrounding objects.
- **6.3** Detect Collision between non-rectangular objects.
- **6.4** Use and declare Public/Global variables accessible by multiple forms.
- **6.5** Use, declare, and initialize arrays.

ACTIVITIES:
- **6.1-6.5** Adding sound effects to previous programs such as the blastoff program.
- Drawing Collision boxes around various images.
- Game Show Program (Who Wants to be a Millionaire?/Deal or No Deal) with Arrays.
- Complex Menu/Restaurant Interface Program using public variables.
- Banking Array Program.

RESOURCES:
- Visual Basic 2008 (Deital)

ASSESSMENTS:
- Sound Board Test Program
- Array Quiz
- Restaurant Interface Program
- Final Exam covering all concepts covered in VB.
- Final Project of student’s choice to demonstrate knowledge of Visual Basic Programming.

REMEDIATION:
- Video/article on collision detection.

ENRICHMENT:
- File saving, Drag and Drop
